

# How to raise an NCR

Five steps, about two minutes. Every screen you will see is pictured.

|       |           |          |          |
|-------|-----------|----------|----------|
| 1 Job | 2 Details | 3 Photos | 4 Assign |
|-------|-----------|----------|----------|

The wizard runs left to right. **Back** never loses what you have typed.

## 1 Open Add NCR

On the dashboard, press the red **Add NCR** button, top right.

The dashboard. Add NCR is the red button, top right.

## 2 Say which job it is against

Pick one of the three boxes. A job is optional — an NCR can be raised without one.

Home / NCR / Raise NCR

## Add NCR

Raises a new non-conformance directly in M1.

Cancel

1 JOB — 2 DETAILS — 3 PHOTOS — 4 ASSIGN

**Which job is this against?**  
Optional — an NCR can be raised without a job

**Job reference**

|------------------------------------------|---------------------------------|----------------------------------|

No job will be recorded against this NCR. You can still enter a part number on the next step.

Back Continue

*No job — nothing else to enter. You can still add a part number on the next step.*

Press **Continue**.

### 3 Describe what went wrong

**Description** is required. Say what is non-conforming, where you found it, and against what it should have been.

To save typing, tap a grey shortcut button under the box. Each drops in an opening line with the specifics in square brackets. You can tap more than one.

**Replace anything in [brackets] with the real detail.**

Tap:

Damaged parts: [part, damage and location].

Make it read:

Damaged parts: 2x 3500 panel, scratched across the face, found on the truck at unload.

Home / NCR / **Raise NCR**

## Add NCR

Raises a new non-conformance directly in M1.

Cancel

1 JOB — 2 **DETAILS** — 3 PHOTOS — 4 ASSIGN

**What went wrong** NCR ID  
**10731**

Classification and description as they will appear in M1

**Description \***

What is non-conforming, where it was found, and against which requirement.

Quick start - tap one or more, then replace the [bracketed] parts

**Category \*** 
**Code** 
**Cause**

**Which part?** 
**What is it called?** 
**How many affected?**

Leave blank if it is not a stocked part
   
Doors, panels or units

**How serious is it?** 
**Hours spent putting it right** 
**Extra cost (\$)**

Your best judgement - it can be changed later
   
Leave at 0 if the work has not been done
   
Materials, freight, callouts

**What was the extra cost for?**

One line, e.g. re-made a pair of doors and re-attended site

Back Continue

The Details step. Shortcuts sit under the description box; the NCR ID top right is the number this gets in M1.

Then fill in what you know:

- **Category** — required. Pick the closest one.
- **Code** and **Cause** — optional.
- **Which part / What is it called / How many affected** — leave the part blank if it is not a stocked item.
- **How serious is it** — your best judgement. It can be changed later.
- **Hours spent putting it right** and **Extra cost (\$)** — leave at 0 if the work has not been done.

The Category list.

Press **Continue**.

## 4 Add photos

Press **Take photo** to use the camera, or **Photos or files** to attach something already on the device. Add as many as are useful.

Photos are the most useful thing you can add — whoever picks this up next was not standing where you are.

Each file must be under 15MB. If one is too big it is named and skipped, and the rest still save. You can skip this step if you have nothing to attach.

## 5 Say who owns it, and save

- **Reported by** — required, already set to you. Change it only if you are entering this on someone else's behalf.
- **Assigned to** — tap a name under the team headings, or use the dropdown for anyone else. It can be left empty if you do not know yet.

| 10731  | Site Issue / Site Measure Issue | -    | 608842 |

Attachments (0)

None. Go back to Photos to add one.

☐ **Raise a Simpro task as a reminder**  
The task window opens once the NCR is saved, so someone is told to review it.

Names are grouped by team. Check the Before you save summary, then press Save.

Tick **Raise a Simpro task as a reminder** if you want someone told to review it — the task window opens once the NCR is saved.

Press **Save**. The NCR number comes back on screen, and the record is in M1.

## If something goes wrong

- **A red message when you save** — read it first; it usually says exactly what is missing.
- **"Your sign-in has expired"** — reload the page, sign in, and press Save again.
- **"M1 is not reachable"** — the NCR is held and goes in by itself when M1 is back. You get the number then.
- **Anything else** — open the **Support** page from the sidebar. It shows what is working and sends a report with the detail already filled in. Attach a screenshot to that email.
